Program Overview

Enterprise Resource Planning (ERP) is the backbone of modern large-scale business operations. SAP is the undisputed global leader in ERP software, used by over 90% of Forbes Global 2000 companies. At Apex Tech Software Institute, our SAP core program is meticulously designed by industry experts to transform ambitious learners into job-ready SAP consultants. Through high-impact practical hands-on labs, you will master SAP configuration, database operations, business process mappings, and real-time enterprise workflows.

Core SAP Modules Covered in Depth

SAP FICO (Financials & Controlling)

- General Ledger (G/L) Accounting
- Accounts Payable & Receivable (AP/AR)
- Asset Accounting & Cost Center setup
- Profitability Analysis (CO-PA) reporting
- Month-end close & financial statement integrations

SAP MM (Materials Management)

- Procurement & Purchasing Cycle (P2P)
- Inventory Management & Stock Transfers
- Master Data setup (Material & Vendor)
- Valuation & Invoice Verification processes
- Integration with Sales (SD) & Finance (FI)

Why Study SAP at Apex Tech Software Institute?

Senior Consultants as Mentors: Learn config tricks directly from active SAP Solution Architects.

M1: SAP ERP Foundations & Navigation

- Introduction to ERP systems & SAP GUI Navigation basics
- Understanding Org Structures: Client, Company Code, Plant, and Storage Locations
- Master Data Concepts: Material Master, Vendor Master, General Ledger Accounts
- Transaction mapping workflows, document concepts, and SAP core T-Codes

M2: SAP Financial Accounting (FI) Configuration

- Financial Global Settings: Fiscal Year Variant, Posting Periods, Chart of Accounts
- General Ledger Configuration: Accounts creation, document posting, and journals
- Accounts Payable (AP) and Accounts Receivable (AR) integration setups
- Integration with Materials Management: Automatic Account Determination (OBYC)

M3: SAP Materials Management (MM) Flow

- Procurement Process setup: Requisitions (PR), Quotations, Purchase Orders (PO)
- Inventory Control: Goods Receipt (GR), Goods Issue, Physical stock transfers
- Logistics Invoice Verification (LIV) and credit memo configurations
- Special procurement cycles: Subcontracting, Consignments, and Pipeline flows

M4: Live Enterprise Project & Interview Prep

- Live Enterprise Simulation: Designing and configuring a company from scratch in SAP
- System integration testing: End-to-end P2P Cycle with automatic ledger mapping
- Resume design boot camp: Structuring experience for SAP Consultant and Analyst positions
- Technical mock interviews, SAP Certification guidelines, and job reference listings
